Election/Restrictions

In view of the substantive amendments to the claims in an amendment (Amendment C; Paper No. 14) filed June 7, 2004, the following restriction requirement, articulated *infra*, has been made:

That is, based on the amendment and Applicants' disclosure, this application contains claims directed to the following patentably distinct species of the claimed invention:

Specie I: Figures 1-6B drawn to a uniform thickness, separate flux guide and magnetoresistance element as disclosed and described with reference to Figures 1-6B (e.g., corresponding to claims 1-8 as presently drafted).

Specie II: Figures 7-10B drawn to an integral flux guide and magnetoresistance element as disclosed and described with reference to Figures 7-10B (e.g., corresponding to claims 9 and 10 as presently drafted).

Sub-Specie A: Figure 11A drawn to a flux guide regulating film positioned at side edges of a flux guide.

Sub-Specie B: Figure 11B drawn to a flux guide regulating film positioned underneath the surface of a flux guide.

Sub-Specie C: Figure 11C drawn to a flux guide regulating film positioned such that the flux guide resides within a recess of the flux guide regulating film.

Applicants are required under 35 U.S.C. 121 to elect a single disclosed species *and also a single disclosed sub-species* for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Art Unit: 2652

Applicants are advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicants will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicants traverse on the ground that the species are not patentably distinct, applicants should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion
